

## New Group Endorsement Form

Founding student's name	
UAlberta email	
Potential new group name	

As part of the new group proposal process, students must collect 2 endorsements to attest to their ability to start a new student group. These endorsements can come from other student group members, executives, professors, instructors, or any other University of Alberta community member. Starting a group requires a time and energy commitment, knowledge of student group operations and procedures, and leadership skills, and it is beneficial for founding members to have these qualities before beginning the new group proposal process. An endorsement can also be an indication that a community member believes that the founding student has the capacity to develop these skills during the new group formation process.

By adding your information below, you affirm that you know the founding student and can attest to their ability to form a new group. Electronic signatures will be accepted.

## New Group Membership Petition

As part of the new group proposal process, students must collect a petition of 10 names of students who would be interested in joining their potential new group. All registered student groups must have at least 10 student members in order to register. Collecting a petition helps ensure there is sufficient interest on campus in a certain idea, and can assist the founding student in finding potential executives to help run the new group.

By adding your information below, you state that you would be willing to become a member of the aforementioned potential new group if the proposal is accepted and registration is approved. Electronic signatures will be accepted.

We do not recommend finding more than 35 potential members in case your proposal is not approved. In the case that a proposal is denied due to duplicating an existing group or service, information about existing groups and services will be provided to the founding student which can be shared with all potential members.
